

*This is not your mother's mammogram.*

*Digital mammography at St. Joseph Hospital.*

In the fight against breast cancer, mammograms are the best screening tool we have for the early detection against breast cancer and is presently the only screening tool that has been shown to decrease mortality.

Today, St. Joseph Hospital has taken that success to a new level by bringing state-of-the-art digital mammography to women in greater Nashua. For all women, particularly those under 50 or with dense breast tissue, that means a better chance at early detection.

Digital mammography – one more way St. Joseph Hospital is leading the way in women's health. To schedule a digital mammogram, call us at 603.595.5700.
