Welcome to St. Joseph Hospital!
As the President/CEO of St. Joseph Healthcare, I am privileged to be a part of a culture that is committed to providing quality healthcare services for the southern New Hampshire community. As you look through the directory, you will find a network of healthcare providers who are committed to meeting the needs of our growing community through innovation, leading technology and the highest quality medical care. Our medical staff is recognized among the very best by all the standard quality measures and by those who count the most—our patients.

The dedicated medical staff at St. Joseph Hospital has made it possible to earn consecutive awards, including “Top Performer on Key Quality Measures” by the Joint Commission, “Get with the Guidelines—Stroke Gold Plus Quality Achievement Award” as well as an “Advanced Certification for Primary Stroke Centers” by the American Heart Association/American Stroke Association. These awards exemplify our service in the areas of heart attack, heart failure, pneumonia and surgical care as well as our commitment and success in our standard of care for our stroke patients.

We are living in an era filled with important changes in the way healthcare is provided and how it will be reimbursed. However, one of the few constants is our role in providing safe, effective and efficient care to our patients. The nurses here at St. Joseph Hospital play a key role in generating successful patient experiences and creating a healing environment. Thanks to their hard work and dedication in caring for our patients and their families, we have received the prestigious distinction as a Magnet hospital, placing us in an esteemed group that demonstrates superior nursing practices and quality patient outcomes.

I invite you to visit our website, www.stjosephhospital.com, to learn more about our quality and patient satisfaction. On our website, you will find an up-to-date listing of our providers and the latest community health offerings. You can also sign up for regular health status updates by signing up for our eNewsletter or on our Facebook and Twitter sites.

On behalf of the entire St. Joseph Healthcare family, we thank you for allowing us to partner with you to provide the best care for you and your family.

Sincerely,
Rich Boehler, MD
President/CEO
St. Joseph Healthcare

WHAT IS A HOSPITALIST?
A hospitalist is a hospital-based physician who specializes in caring for patients in the hospital setting. From routine hospitalizations to the most complex of medical cases, hospitalists treat every medical condition from the time of admission to the day of discharge at the request of your primary care physician. This allows your primary care doctor to focus on your healthcare needs during office visits and provide personalized attention on a long-term basis.

About St. Joseph Healthcare

St. Joseph Healthcare is a regional, full-service health care system dedicated to providing innovative, high-quality healthcare. The main campus, St. Joseph Hospital, is a 208-bed facility combining the latest technologies and personalized medicine with conveniences such as around-the-clock emergency services, comprehensive, specialized treatment and preventive services at the Cardiovascular and Diabetes Center, Breast Care Center, and Cancer Center, a CARF-accredited stroke program at our Rehabilitation Center, and labor and delivery services at the Childbirth Center. We offer an extensive physician network of specialists and primary care providers. Affiliates include St. Joseph Home & Hospice.

MEDCALL, PHYSICIAN, AND SERVICE REFERRAL DEPARTMENT
Choosing the right provider is as easy as picking up the phone. Our referral specialist will listen to you, answer your questions and suggest highly skilled primary care providers or specialists for your particular needs. We can provide important information about each physician: specialty, years in practice, educational background, geographic location and even languages spoken. This is a free service for anyone seeking information about the physicians and services provided by St. Joseph Hospital.

For more information, please visit our website at www.stjosephhospital.com or call MedCall at (800) 210.9000.

PRE-REGISTRATION
One of our goals is to reduce your wait time when coming into the hospital for tests and procedures, making your experience more convenient. We encourage all patients to pre-register for their services. There are two options to register for tests and procedures.

1. You may use our online pre-registration form by visiting www.stjosephhospital.com. The online registration needs to be completed at least 24 hours prior to your visit; or by 4:00 PM on Friday to insure completion for Monday appointments.
2. You may call the Appointment Central Pre-Registration Department at (603) 598.3323 to complete your pre-registration over the phone. When you call, you will be asked for your insurance information, along with some personal information. Appointment Central representatives are available Monday through Thursday, 7:00 AM to 7:30 PM; Friday, 7:00 AM to 4:30 PM; and Saturday, 8:00 AM to 12:00 noon.

FINANCIAL REPRESENTATIVES
Customer service representatives are available to answer your financial questions. Representatives are available to assist you or your family with questions regarding insurance benefits, hospital charges, payment options and applications for financial assistance. Representatives are available from 8:00 AM to 4:00 PM, Monday through Friday, by calling (603) 595.3975.

BILL PAYMENT
You can quickly and securely pay and keep track of your St. Joseph Hospital bill online, as well as keep insurance information updated. All payment information is kept secure and confidential and is processed via a secure server. This feature is available 24 hours a day, seven days a week.

For more information visit www.stjosephhospital.com or call the Customer Service Representatives at (603) 595.3975.

Additional Resources

ADVANCE DIRECTIVES
An advance directive allows you to live on your terms. Whether you’re 18 or 80, documenting your wishes today means your family won’t have to make heart-wrenching decisions later. We encourage everyone to talk with their family, their friends, their doctor. Know your options, decide what’s right for you, and then put it in writing.

By creating an advance directive, you are making your preferences about medical care known before you’re faced with a serious injury or illness. This will spare your loved ones the stress of making decisions about your care while you are sick. Any person 18 years of age or older can prepare an advance directive.

What is an advance directive?
An advance directive tells your healthcare provider what kind of care you would like to have if you become unable to make medical decisions. A good advance directive describes what kind of care you want if you have an illness that you are unlikely to recover from, or if you are permanently unconscious.

Advance directives usually tell your provider that you don’t want certain kinds of treatment, or that you want a certain treatment no matter how ill you are. Advance directives can take many forms. Laws about advance directives are different in each state.

What is a living will?
A living will is one type of advance directive. It is a written, legal document that describes the kind of medical treatments or life-sustaining treatments you would want if you were seriously or terminally ill. A living will doesn’t let you select someone to make decisions for you.

What is a durable power of attorney for health care?
A durable power of attorney for health care (DPOAH) is another kind of advance directive. A DPOAH states whom you have chosen to make health care decisions for you. It becomes active any time you are unconscious or unable to make medical decisions. A DPOAH is generally more useful than a
living will, but may not be a good choice if you don’t have another person you trust to make these decisions for you.

Living wills and DPOAHs are legal in most states. Even if they aren’t officially recognized by the law in your state, they can still guide your loved ones and doctor if you are unable to make decisions about your medical care. Ask your doctor, lawyer or state representative about the law in your state.

**HEALTH CARE PROVIDER CREDENTIALS**

**Medical School:** In addition to an undergraduate degree, a physician must complete four years of medical school at an accredited institution.

**Residency:** A residency is a required post-internship hospital training period of two to six years that concentrates on a particular specialty. This indicates where physicians did their residency.

**Fellowship:** A fellowship is a voluntary, post-residency training period of two to six years. This indicates facilities where physicians did fellowships in their special areas of interest.

**APRN:** Advanced Practice Registered Nurse (NP; FNP)

Nurse practitioners are nurses who hold a master’s degree in nursing. Nurse practitioners can perform history and physical exams; diagnose disease; order, perform and interpret laboratory, radiographic and other diagnostic tests; and prescribe and dispense medications. They work closely with physicians in their specialty area to provide comprehensive care of patients.

**CNM:** Certified Nurse Midwife

Certified Nurse Midwives are advanced registered nurse practitioners with additional comprehensive obstetrical and gynecological training. In addition to maternity care and delivery they provide care of women of all ages. They can order diagnostic tests, and prescribe treatments and medications.

**DO:** Doctor of Osteopathy

A Doctor of Osteopathic Medicine (DO) completes four years of medical school and is licensed to perform surgery and prescribe medication. Osteopathic physicians receive an additional 300 to 500 hours in the study of hands-on manual medicine and the body’s musculoskeletal system. Osteopathic medicine is dedicated to treating and healing the entire patient as a whole, and places special emphasis on the body’s musculoskeletal system and preventative medicine.

**DPM:** Doctor of Podiatric Medicine

Doctors of Podiatric Medicine (DPMs) are physicians and surgeons who practice on the lower extremities, primarily on feet and ankles. The preparatory education of most DPMs includes four years of undergraduate work, followed by four years in an accredited podiatric medical school, followed by a hospital-based residency. DPMs diagnose and treat disorders, diseases, and injuries of the foot and lower leg. They can prescribe medications, order diagnostic tests or physical therapy.

**How can I get more information about an advance directive?**

Advanced Care Planning Guides for the State of New Hampshire as well as assistance in completing the Advanced Directives forms are available to you at no charge through our social work team at St. Joseph Hospital. To receive your guide and to make an appointment, please call Mary Ann Antonelli at (603) 882.3000, ext. 63850.

**Hospitalist:** MD or DO

Hospitalists are medical doctors or doctors of osteopathy who specialize in taking care of patients within the hospital. They work closely with the primary care physicians and specialists to provide optimal care for each patient during their hospital stay.

**MD:** Medical Doctor

A medical doctor has completed an undergraduate degree followed by four years of medical school, and then a residency program. A residency is done in the area of specialty chosen by the physician. The length of residency varies by the specialty but is typically two to six years. All physicians must then pass state licensure requirements and examinations. The medical doctor will then achieve certification in their area of expertise by the American Board of Specialties.

**Psychologist:** A clinical psychologist has completed 5–7 years of graduate study, culminating in a doctorate degree. They may hold a PhD (Doctor of Philosophy), or a PsyD (Doctorate of Psychology.) Licensing requirements for psychologists vary from state to state, but at least a one- or two-year internship is required to apply for a license to practice psychology.

**Psychiatrist:** Psychiatrists begin their careers in medical school. After earning their MD, they go on to four years of residency training in mental health, typically at a hospital’s psychiatric department. After completing their residency, these physicians can be licensed to practice psychiatry. They counsel and treat patient and can prescribe medications.

**PA:** Physician Assistant

Physician assistants are educated in intensive medical programs accredited by the Accreditation Review Commission on Education for the Physician Assistant (ARC-PA).

Physician assistants (PAs) practice medicine under the supervision of physicians and surgeons. PAs are formally trained to provide diagnostic, therapeutic, and preventive health care services, as delegated by a physician. Working as members of the health care team, they take medical histories, examine and treat patients, order and interpret laboratory tests and x-rays, and make diagnoses. They also treat minor injuries, by suturing, splinting, and casting.

Welcome to St. Joseph Hospital!
As the President/CEO of St. Joseph Healthcare, I am privileged to be a part of a culture that is committed to providing quality healthcare services for the southern New Hampshire community. As you look through the directory, you will find a network of healthcare providers who are committed to meeting the needs of our growing community through innovation, leading technology and the highest quality medical care. Our medical staff is recognized among the very best by all the standard quality measures and by those who count the most—our patients.

The dedicated medical staff at St. Joseph Hospital has made it possible to earn consecutive awards, including "Top Performer on Key Quality Measures" by the Joint Commission, "Get with the Guidelines—Stroke Gold Plus Quality Achievement Award" as well as an "Advanced Certification for Primary Stroke Centers" by The American Heart Association/American Stroke Association. These awards exemplify our service in the areas of heart attack, heart failure, pneumonia and surgical care as well as our commitment and success in our standard of care for our stroke patients.

We are living in an era filled with important changes in the way healthcare is provided and how it will be reimbursed. However, one of the few constants is our role in providing safe, effective and efficient care to our patients. The nurses here at St. Joseph Hospital play a key role in generating successful patient experiences and creating a healing environment. Thanks to their hard work and dedication in caring for our patients and their families, we have received the prestigious distinction as a Magnet hospital, placing us in an esteemed group that demonstrates superior nursing practices and quality patient outcomes.

I invite you to visit our website, www.stjosephhospital.com, to learn more about our quality and patient satisfaction. On our website, you will find an up-to-date listing of our providers and the latest community health offerings. You can also sign up for regular health status updates by signing up for our eNewsletter or on our Facebook and Twitter sites.

On behalf of the entire St. Joseph Healthcare family, we thank you for allowing us to partner with you to provide the best care for you and your family.

Sincerely,
Rich Boehler, MD
President/CEO
St. Joseph Healthcare
